MediMeet

UI/UX Study

Problem Statement

Many elderly and rural users struggle to access healthcare services due to: Long travel distances Delayed emergency response Lack of proper guidance Complex healthcare apps Existing platforms mainly focus on doctor consultation but lack integrated emergency and accessibility support.

Solution

Emergency SOS ambulance booking Real-time ambulance tracking Video consultation AI health chatbot Medicine reminders Digital health records Smart notifications

- Emergency Ambulance
- Real -time Tracking
- Video consultation
- AI Health chatbox
- Medicine Reminder
- Digital Health Records

Innovations

- ★ Emergency + telemedicine in one platform for continuous care.
- ★ AI chatbot for quick symptom guidance and doctor suggestions.
- ★ Real-time ambulance tracking to reduce patient anxiety.
- ★ Elderly-friendly and inclusive design with simple navigation.
- ★ Long-term healthcare support through reminders and health records.

Impact

- ★ Faster emergency response and reduced critical delays.
- ★ Improved healthcare access for rural and remote users.
- ★ Better medicine adherence through smart reminders.
- ★ Reduced stress and confusion during emergencies.
- ★ Positive social impact by supporting accessible healthcare.

Learnings

- ✓ End-to-End Product Design
- ✓ Importance of accessibility
- ✓ User Empathy
- ✓ Real-world Problem Solving
- ✓ Domain Understanding
